Summary

Aspiring Full Stack Developer with strong knowledge in Java, Spring Boot, Hibernate, and MySQL. Skilled in building web applications and working with both frontend and backend technologies. Passionate about problem solving and continuously learning new technologies.

Skills

Languages: Java, SQL, JavaScript, TypeScript
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend: Spring Boot, REST APIs, JDBC, Hibernate, Spring Data JPA
Database & Concepts: MySQL, OOP, DBMS, DSA
Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code

Experience

UI/UX Design Intern | NoviTech R&D Private

June 2025 – July 2025

Limited

Tools Used: Figma, Canva

- Completed a 1-month UI/UX Design internship, applying user-centered design principles to create intuitive and visually consistent interfaces.
- Designed wireframes and interactive prototypes using Figma, focusing on structured navigation, responsive layouts, and usability.
- Applied responsive design and UI/UX principles to improve interface consistency and overall user experience.

Projects

Student Leave Management System | REST API, Spring Boot, MySQL

- Built a full-stack Student Leave Management System to digitize student leave applications and approval workflows.
- Built RESTful backend services using Spring Boot, Spring Data JPA, and MySQL with structured business and persistence layers.
- Implemented a 4-level role-based approval workflow — Student → Mentor → HOD → Warden — for structured leave review and approval.

Student Management System | Java, Spring Boot, REST API, MySQL

- Engineered a college-focused Student Management System to digitalize student profile books and maintain centralized academic records throughout the 4-year academic journey.
- Implemented features to monitor student performance and track semester-wise academic progress, including marks and other student records.
- Built a centralized system to manage student profiles, academic marks, certificates, and achievements, enabling efficient long-term tracking of student data.

Awards & Certifications

- Full Stack Development Course – NoviTech Pvt. Ltd.
Completed practical training in full-stack development, gaining hands-on exposure to frontend, backend, database integration, and web application development.
- Java Programming – Infosys Springboard
Strengthened programming fundamentals in Java, Object-Oriented Programming (OOP), exception handling, and core application development concepts.
- SQL – Infosys Springboard
Developed knowledge of relational databases, SQL queries, joins, subqueries, and database operations for data management.

Education

B.Tech Computer Science and Business System
Dhaanish Chennai College of Engineering, Chennai

Graduated: 2027
CGPA: 8.71 / 10
